Subject: Weekly Administrator Report Items - OPRA

Per Deb's request for her RA weekend report:

Uinta Basin (eastern Utah) Wintertime Ozone: The Uinta Basin ozone episode continued through February 7th with ozone National Ambient Air Quality Standards (NAAQS) exceedances occurring every day since January 29th (ozone concentrations dropped to 53 parts per billion (ppb) on February 8th). Ozone reached *Very Unhealthy Air Quality Index* levels with the 8-hour average above 105 ppb at the Ouray monitor on February 1, 3 and 5, 2017. Ozone was in the *Unhealthy* (86-104 ppb) and *Unhealthy for Sensitive Groups* (71 to 85 ppb) levels in the communities of Myton and Roosevelt
